Student Setu: voiceover for the new demo video (follows your PDF)

Video: `Student_Setu_Demo_PDF_Script.mp4` , **3:25**, 1080p, no sound.

It covers **PDF 1:10 → 4:35** (Parts 2, 3 and 4). Part 1 (introduction and problem) and the conclusion stay on camera, exactly as in your PDF. **Full video ≈ 4:45.**

Video time	PDF time	Section	Speaker
0:00–0:45	1:10–1:55	① School student pathway	B: Frontend / UI
0:45–1:20	1:55–2:30	② Skills Hub, AI courses, leaderboard, matched jobs	B: Backend
1:20–1:50	2:30–3:00	③ Hostels & tiffin map, study materials	B: Frontend / UI
1:50–2:35	3:00–3:45	④ SIDF	A: Team Lead
2:35–3:05	3:45–4:15	⑤ Counseling & alternative careers	A: Team Lead
3:05–3:25	4:15–4:35	⑥ Tech stack & architecture	B: System Architect

A = you (Team Lead) · **B** = your friend. If your team has more members, give each section to the person your PDF names.

> ✏️ The lines follow your PDF, but I changed a few words so everything you say is **true and visible on screen**. Judges can open the live site. See "What I changed" at the end.

---

① 0:00–0:45 · B · School student pathway

*On screen: home page → "Where are you today?" → Login → **School student** → Class 12 subjects → MBBS (NEET UG roadmap, notes & videos, Plan B) → PCM → B.Tech (JEE roadmap)*

> "Student Setu is a completely free platform for three groups: school students, college students and graduates. Here, a school student logs in. They pick their Class 12 subjects, and Student Setu instantly shows every public and private course open to them, like MBBS, with the entrance exam, a step-by-step preparation roadmap, and free notes and video lectures. Switch to PCM, and B.Tech appears with its JEE roadmap."

② 0:45–1:20 · B · Skills Hub & jobs

On screen: Skills Hub → AI Skill Courses → AI Prompt Lab (score 100) → leaderboard & "Next step" → Vocational (Hindi) → Careers: update profile → matched jobs

> "To bridge the skills gap, our Skills Hub brings the best free AI courses, and students practise hands-on in our AI Prompt Lab. A personal leaderboard tracks progress and shows the exact next step to reach a job. We also offer vocational training in Hindi. Once a student graduates, they update their profile, and Student Setu filters out the noise to show only jobs matched to their degree and skills."

③ 1:20–1:50 · B · Student life support & study material

On screen: Hostels → map with colleges, hostels and tiffin centres → tiffin cards → Study Resources → RGPV → Sem 5 → DBMS → PYQs

> "For students moving to another city, we show verified hostels and home-style tiffin centres around their college on one map: healthy food in their budget, which also helps home-based women entrepreneurs grow. And for daily study, notes, previous-year papers and syllabus are organised university-wise, free to download."

④ 1:50–2:35 · A · SIDF

On screen: SIDF → events in government colleges (Register) → mentors → Smart India Hackathon → government funding schemes → startup idea form → instant feedback

> "Elite colleges have incubation centres; government and tier-3 colleges don't. So we built SIDF, the Student Innovation and Development Forum, right inside Student Setu, with no external registration. Students join startup events in their own colleges, get guidance from mentors, prepare for national hackathons like Smart India Hackathon, and find government funding schemes like the Startup India Seed Fund. They can even submit an idea and get instant feedback."

⑤ 2:35–3:05 · A · Counseling & alternative careers

On screen: stress-support banner (Tele-MANAS 14416) → NEET alternatives → drop-year check → Talk to an Expert booking

> "Most importantly, Student Setu protects students from burnout. If a student misses the NEET cut-off, they instantly see strong alternative careers, like physiotherapy, nursing or lab technology, and a calm drop-year check. They can talk to an expert counsellor, and for urgent support we connect them to the government's free Tele-MANAS helpline, 14416."

⑥ 3:05–3:25 · B · Tech stack

On screen: Architecture page: users → React PWA + CDN → Netlify Functions → Gemini AI, Netlify Blobs → path to millions of users

> "Our stack is built to scale: a React progressive web app that works on slow networks, serverless Netlify Functions on Node.js, Google Gemini for AI, and Netlify Blobs for storage, with a central database planned as we grow nationally."

What I changed from your PDF (and why)

Your PDF said	Changed to	Why
"We host cutting-edge AI Skill Courses… hands-on AI training on our platform"	Free AI courses (Google, Microsoft, Kaggle…) + hands-on **AI Prompt Lab**	The courses link to free providers; the Prompt Lab is the hands-on part on our site
"We partner with universities to upload lectures"	Notes, PYQs & syllabus organised university-wise	No university partnership yet

Your PDF said	Changed to	Why
"Onboarded Expert Academic & Mental Health Counselors... official contact number"	Talk-to-an-Expert booking + **Tele-MANAS 14416** + support email	Counsellor profiles are demo mentors; the helpline is real and verified
"[Node.js], [MongoDB/SQL] manage profiles, tiffin geolocations, lectures"	React PWA, Netlify Functions (Node.js), Gemini, Netlify Blobs; database planned	That is the real stack; MongoDB is not used

Recording tips

- **One file per section:** name them `S1_B`, `S2_B`, `S3_B`, `S4_A`, `S5_A`, `S6_B`.
- **Or one file for everything:** record all of it in one go while the video plays.
- **Pace:** speak calmly. Every line fits its time at a normal pace.
- **Send me the audio** and I'll place it on the video (and add your camera parts if you send them too).
